

THE DIGITAL TRANSFORMATION SUPPORTING PURCHASING PROCESSES

TESISQUARE, a leading provider of technological solutions for the Supply Chain, has entered into a partnership with **Amplifon**, an Italian multinational and global leader in hearing care services and solutions, for development of a digital transformation programme for certain purchasing processes, with a special focus on Procure to Pay. Specifically, making use of the implementation of a single management software (ERP) for all Group countries, Amplifon has decided to implement a centralised and digitalised purchasing system based on an EDI solution – developed with the aid of **TESISQUARE** – applicable to all aspects of relations with direct product suppliers, covering the entire procurement cycle from order (reception and confirmation) to aspects pertaining to shipping notifications (ASN), invoicing and credit notes.

TESISQUARE's contribution to **Amplifon**'s digitalisation projects is not limited exclusively to management of EDI flows in the purchasing process, but will permit exchange of over 5 million documents a year handled by the solution, as well as storage of invoices from different countries, in compliance with specific regulations currently in place for 14 of the 25 countries where **Amplifon** operates.

All at high levels of efficiency, corporate productivity and competitiveness, thanks above all to consistent savings on the amount of work required, particularly for order processing, and greater control over the entire supply chain, as well as reduction of the possibility of error.
